

2 Days Workshop

CAPITAL MARKET

Overview

India's experience with the equity market is the oldest in Asia, still people here find it difficult to put their hard earned money into work due to lack of proper knowledge and end up gaining the bank interest..Indian capital markets have witnessed one of the fastest growth rate globally with huge participation from foreign investors, domestic institutions and large pool of retail clients. In the year 2012 FIIs pumped \$23.3 bn into Indian stock markets, the Indian stock market has emerged as the third-best performer globally, yielding almost 25% returns. Capital market segment on all India basis saw total turnover of Rs 3,406,211 crore in 2012. This rapidly growing participation in last couple of years have opened highly rewarding career opportunities for budding professionals in the area of investing, trading, research and analysis and other related domains. There is a huge demand for trained and skilled professionals not only having conceptual understanding of the segment, but also involved in exploring opportunities for profitable investing and trading avenues using various indicators and instruments. This high-end requirement of the industry has led us to evolve the training module that inculcates this required skill sets and professional approach into the aspiring market players.

Objective

The aim of the program is to help participants acquire in-depth knowledge of capital pursue a career in financial market services.
