

Online/Offline Workshop

EQUITY DERIVATIVES MARKET

Overview

India's tryst with exchange traded derivatives began in the year 2000 when both NSE & BSE commenced trading in equity derivatives. In the year 2012-2013 total turnover of NSE in Equity Derivatives Segment is 28711605.29 Cr till Feb'2013. According to the Future Industries Association in terms of contract traded is the fourth target exchange across the Globe.

The fast paced growth of Derivatives market also created the dearth of practically trained derivatives trading professionals and hence emerge the excellent career opportunities for budding professionals in the area of jobbing, trading, research and analysis and other related domains. There is a huge demand for trained & skilled professionals not only having conceptual understanding of the segment, but involved in exploring opportunities for profitable trade using leverage provided by various Equity Derivatives instrument. This high end requirement of the industry has inspired us to involve the training module on basis of Derivatives market & help students get acquainted with latest trends in the market and develop a general know-how.

Objective

The aim of the program is to help participants acquire in-depth knowledge of derivatives markets and pursue a career in financial services. The program lays emphasis on the theoretical and practical concepts of rapidly growing complex world of Futures and Options in Financial market. It has been designed by professionals with many years of experience in the derivatives market and financial domain. The insight will help participants to understand derivatives from an analytical point of view and to develop and understand complex derivatives strategies with ease.
